

# POAC's Sensory Kit for First Responders™

**POAC's Sensory Kit for First Responders** is a great tool for your interactions and field contacts with individuals with Autism Spectrum Disorder (ASD). The kit includes several items that are designed to help calm individuals with ASD experiencing crisis or difficult situations by giving them "sensory input" necessary to help them cope and regulate. POAC sells the complete kit for \$60 each plus shipping. All items are BPA-free and can be washed with warm soapy water. Adult supervision is required. All POAC Sensory Kits are assembled by adults with ASD and include the following items.

**Oball™ Toy Ball:** These bendable balls are full of finger holes that are incredibly easy to catch, captivating to hold, and safe to throw. They are virtually indestructible. Dishwasher safe and safe to chew.

**Toysmith Wacky Tracks™ Finger Fidget Stress Reliever:** Playing with this toy provides an energy outlet that allows users to focus and calm down. All ages love playing with this item. This is the only brand where the individual links don't pull apart. This articulated chain can bend into countless shapes.

**Chewy Tubes™:** These safe and durable chewy toys are appropriate for both kids and adults with special needs. The "T" shape design of the chewy tube allows for easy holding and keeps the user from pushing the tube too far back in their mouth to prevent gagging. Use it to redirect individuals chewing on their clothes and provide the sensory input to help reduce anxiety.

**POAC Information Cards:** 25 "I Have Autism" cards for individuals with ASD to present to Law Enforcement and First Responders  
25 "My Child Has Autism" cards for parents to use as needed
